 [linkedin.com/in/jhimwelpragojuan](https://www.linkedin.com/in/jhimwelpragojuan)

Results-oriented Full Stack Developer with expertise in utilizing relevant frameworks and technologies to create scalable enterprise apps. demonstrated proficiency in leveraging React.js, ASP.NET, and Node.js to construct maintainable solutions while complying to OOP concepts and industry-standard patterns (MVC, MVVM, and 3-tier architecture). has constructed decentralized apps (dApps) with Web3 capability and integrated Solana smart contracts, demonstrating experience in blockchain development. demonstrated effectiveness in Agile settings by spearheading daily scrums and providing solutions that are client-focused. adept at using SQL Server and Express.js for backend implementation as well as TypeScript and Tailwind for frontend development. combines excellent technical knowledge with teamwork abilities to turn complicated specifications into effective, user-focused solutions.

WORK EXPERIENCE

.NET DEVELOPER

Offshore Business Processing

March 2024 - Present

- Developed and maintained real-time web platforms with messaging, chatbot, and data-driven features.
- Built secure submission systems and enhanced existing applications with new features and performance improvements.
- Supported legacy systems, including DLL maintenance and bug resolution.
- Managed deployments through IIS and Plesk and implemented security enhancements like reCAPTCHA and spam filtering.
- Delivered several solutions independently, leading architecture, development, QA, and deployment efforts.

PROGRAMMER I

Systems and Software Consulting Group INC.

January 2024 - February 2025

- Contributed significantly to developing client change requests for an existing web system.
- Provided support as a developer, fixing client-reported bugs and maintaining the existing system.
- Utilized technologies such as ASP.NET, HTML, CSS, JavaScript, Bootstrap, Kendo MVC UI, SQL, Crystal Report, and SQL Server Reporting Services (SSRS).
- Worked with MVC, MVVM, and 3-tier architecture, enhancing my understanding of these patterns.
- Applied Object-Oriented Programming (OOP) principles to ensure scalable and maintainable solutions.

Web Developer (WEB 2 & WEB 3)

Freelancing

December 2023 - Present

- Specialized in web development using React JS, Tailwind, Sass, Node.js, JavaScript, and TypeScript.
- Developed fully responsive landing page websites for clients, ensuring compatibility across both desktop and mobile devices.
- Handled backend development tasks using Sequelize (ORM), Node.js, Express.js, JWT, and API integration.
- Implemented Web3 functionality in React applications, specifically integrating Solana blockchain smart contracts using React hooks.
- Built front-end interfaces for decentralized applications (dApps) on Solana, managing wallet connections and blockchain transactions.

RELEVANT SKILLS

Full-Stack Development

- Developed and maintained real-time enterprise web platforms using ASP.NET (MVC/MVVM) and C#, integrating messaging systems and chatbot-driven interactions.
- Designed secure application modules and form submission pipelines with server-side validation, reCAPTCHA, and spam filtering to enhance security and data integrity.
- Supported and modernized legacy systems, including DLL maintenance, performance tuning, and critical bug resolution.
- Built and consumed RESTful APIs using .NET Core and SQL Server, contributing to scalable, service-oriented application architectures.
- Managed end-to-end delivery for independent development initiatives, including architecture planning, coding, QA testing, and deployment to IIS/Plesk environments.

Front-End Development

- Developed responsive and dynamic user interfaces using React, Next.js, JavaScript, and TypeScript with a focus on usability and maintainability.
- Implemented UI components using Kendo UI, Bootstrap, Tailwind, and ShadCN, ensuring consistency across desktop and mobile devices.
- Enhanced data-driven UI experiences using MVVM/MVC patterns and clean state management practices.
- Strong foundation in HTML5, CSS3, and jQuery for building cross-browser compatible and accessible front-end layouts.

Web3 Development

- Developed decentralized applications (dApps) using ReactJS and NodeJS
- Experience integrating blockchain functionality into web applications

EDUCATIONAL HISTORY

Bachelor of Science in Information Technology
University of the East
2019 - 2023

AWARDS

Latin Honor
Cum Laude
Academic achievement

Company Award
Employee of the month (April, 2024)
Learning & Development Achievement

Company Award
Nominee of the month (March, 2024)
Learning & Development Achievement
